

Make the Best Home Care Choice

Get the answers you need to find the right care for your family.

When setting up in-home care, it's easy to focus just on the cost of care. But many factors can affect the quality of your loved one's care—and your family's overall care experience. Who handles issues—small or large—when they arise? What if a caregiver cancels or gets sick? Who determines safety protocols? Is there a process for tracking the care plan and keeping family members informed?

Be sure you're getting all the information you need to make the right home care choice for you and your loved one.

Important questions to ask when considering your options:

- ✓ **Quality.** How do you verify the skills, reliability, and quality of your caregivers?
- ✓ **Backup.** What happens if a caregiver gets sick or can't make a scheduled visit?
- ✓ **Performance.** Who manages your caregivers day-to-day? And what if there's a problem with performance or caregiving style?
- ✓ **Insurance.** Who's legally responsible if a caregiver gets sick or injured?
- ✓ **Communication.** How do you know what happens during each visit—and how your loved one is doing?
